

## **Adjustment Budget 2023/24**

### **Executive Summary**

The municipality is facing numerous cash flow challenges because of limited revenue sources. The municipality need reduce spending on consumable items to spending on infrastructure improvements as it also creates employment and possibly attracts investments. The midyear feedback report from treasury highlighted several challenges that the municipality still need to address in terms of system correction and spending. As the municipality table the adjustment budget it needs to consider input from Provincial Treasury and gaps identified on in year reports. There's still gap on project costing, this affects the cash flow of the municipality greatly as the municipality must accommodate increasing cost of the projects. The municipality as has tried to implement cost containment measures on certain items on general expenses however this is not enough, therefore more measures to be put in place to adequately address that. The municipality need to consider reducing expenditure on consultants particularly on Machinery Hire and in General use of consultants. And look at the possibility of acquiring Equipment for maintenance infrastructure internally rather than hiring it outside(outsourced). Reducing expenditure on consultants and employing capable individuals, would not only reduce cost but it will bring necessary stability in the institution. The outcome of the midyear assessment report and feedback indicated the need to adjust the original budget tabled last year towards the end of June 2023.

### **MID YEAR OUTCOME**

The outcome of mid-year assessment report was as follows:

- a. The revenue billing reflected 19% overperformance, as a result the Property Rates are adjusted.
- b. Operating expenditure reflected only 25%, significantly reduced, savings taken either infrastructure improvements or capital projects,
- c. Capital expenditure was only 21%, because of the delay in implementation of projects.

The municipality has the following challenges at mid-year.

- a. Outstanding creditors- proper plan must be in place to deal with this issue, as the municipality must comply with regulations of ensuring that creditors are paid within 30 days and mindful of cash flow.
- b. Revenue collection challenges- The large portion of the community falls under indigent category because of unemployment and high standard of living in the country. This makes it very difficult to collect from this category. But also, the municipality has engaged debt collector to assist with collection.
- c. Cash Flow Constraints – This remains the biggest challenge for the municipality, therefore the proper plan shall be in place to improve the municipality viability.
- d. Funding and Sourcing – It is evident that the municipality require more sourced funding for projects, therefore a lot need to be done on this part for sustainability of the

municipality and improving service delivery, since it seems as the only hoping for acceleration of the service delivery.

### Proposed Adjustment Budget 2023/24

It is against this background that the following proposal is made for the 2021/2022 adjustment budget for the municipality to continue providing basic services to the people in a sustainable manner as required by the Constitution of the country.

The table above reflects operating revenue sources for the Municipality for the 2023/2024 financial year. After careful consideration of the 2023/2024 mid-year budget performance the following adjustments are proposed in line with section 28 of the Municipal Finance Management Act no. 56 of 2003.

The overall operating revenue budget will decrease from R 179 million to R 175 million and that is due to the following adjustments.

- Property rates revenue will be adjusted upwards by R2.2 million from R 42 million to R 44 million. This due to the rezoning of categories (AGA to MIN)
- Mining funding of R 5.7 million which has not materialised.
- And other immaterial small items that has been decreased because of slow performance.

The extensive engagement between the Municipality and Provincial Treasury on the midyear budget assessment concluded by making proposals for the adjustment in terms of section 28 of the Municipal Finance Management Act No 56 of 2003.

The proposed adjustments on operating budget are as follows:

- a. Employee related costs will be adjusted upwards by R 3.6 million. This is informed by the performance of the mid-year assessment, but also to cover for unauthorized expenditure at the end of the year.
- b. Remuneration of councillors will be adjusted upwards by R 1,9 million, this is informed by the performance of the mid-year assessment which shows an over-spending with same amount which could lead to over-spending or unauthorized expenditure at year end.

## Repairs and maintenance

Repairs or Maintenance of acquired assets are amongst the operating budget. However, they amount for a huge amount of budget and contribute significantly to the service delivery, it is important to depict it separately.

The municipality has been spending a lot of money on Machinery Hire which is part of Repairs and Maintenance budget. These machineries are hired from consultants which is discouraged by the municipality's Cost Containment Policy and Treasury. To mitigate that, on adjustment R 1.4 million adjusted from Machinery Hire to maintenance of broken Graders and other heavy-duty machinery.
